Status: Awaiting Graduation

COLLINS SIXPENCE

SOFTWARE DEVELOPER & TECH INSTRUCTOR

PROFESSIONAL SUMMARY

Passionate and result-driven Software Developer and Coding Instructor currently finishing studies at **Uncommon.Org**. Proficient in full-stack web development using modern technologies such as **React.js, TypeScript, Django, Python, Node.js, and Express.js**. Proven track record of designing functional e-commerce engines, database management learning platforms, and high-converting commercial landing pages. Adaptable, proactive, and eager to leverage technical problem-solving skills to contribute to innovative solutions at **Smatech Group**.

KEY PROJECTS & CLIENT WORK

Superfert Fertilizer Commercial Landing Page
Tech: React.js / Tailwind CSS / Web Design

Designed and developed a responsive, high-performance landing page for Superfert Fertilizer, enhancing brand visibility and digital presence for agricultural products.

Django-Python E-Commerce Platform
Tech: Python, Django, HTML/CSS, SQL

Architected a full-featured e-commerce web application complete with product catalog management, dynamic user authentication, session handling, and database integration.

DBMS Interactive Learning Platform
Tech: Full-Stack Web Development, Database Management

Created an educational platform aimed at simplifying database concepts, query execution, and relational database management principles for learners.

EXPERIENCE & LEADERSHIP

Coding Instructor / Youth Mentor — **Uncommon.Org / Community Outreach** Present

- Taught block-based programming (Scratch) and foundational computer literacy to primary and secondary school students across Harare.
- Simplified complex algorithmic logic and computational thinking for young learners, boosting youth digital literacy.
- Fostered strong communication, leadership, and public speaking skills while presenting tech curriculum to schools.

Software Engineering Student Developer — **Uncommon.Org** 2025 - 2026

- Engaged in intensive project-based software engineering training covering full-stack web engineering, API development, and UI/UX best practices.
- Collaborated with peer developers using Git version control to complete client and internal web initiatives.

CORE COMPETENCIES

- Full-Stack Web Development
 - RESTful APIs & Backend Architecture
 - UI/UX & Product Design (UXCEL)
- Cybersecurity & Threat Mitigation
 - Prompt Engineering & AI Tools
 - Technical Support & Troubleshooting
