Professional Summary

Versatile, result-driven Software Developer and Tech Instructor completing software engineering studies at Uncommon.org. Proficient across the full software development lifecycle using modern technologies including React.js, TypeScript, Django, Python, Node.js, and Express.js. Experienced in architecting robust web applications, database systems, commercial digital platforms, and mentoring emerging tech talent. Dedicated to building high-performance software and delivering value across dynamic engineering environments.

Experience & Leadership

Software Engineering Student Developer, Uncommon.org Present

- Develop production-grade full-stack web applications using React.js, Django, Node.js, and Express.js with a focus on code efficiency, modularity, and security.
- Collaborate in agile developer teams utilizing Git and GitHub for version control, continuous code reviews, CI/CD workflows, and structured sprint deliveries.
- Apply human-centered UI/UX design principles, wireframing, and component modeling to produce intuitive, modern digital interfaces.

Coding Instructor / Youth Mentor 02/2026 – 07/2026 | Harare

Uncommon.org / Community Outreach

- Taught block-based programming (Scratch) and foundational computer literacy to primary and secondary school students across Harare.
- Simplified complex algorithmic logic, data structures, and computational thinking for over 100+ youth learners, boosting digital literacy.
- Demonstrated strong leadership, public speaking, and technical communication in school classroom environments.

Education

Software Development Program, Uncommon.org

Status: Present (Awaiting Graduation)

Ordinary Level (O-Levels)

9 Subjects Passed (incl. Maths & English)

Tech Stack & Skills

Frontend

React.js, TypeScript,
HTML5/CSS3, Tailwind CSS

Backend & DB

Python, Django, Node.js,
Express.js, DBMS / SQL

Design & Soft Skills

Product Design, UX/UI,
Teaching / Mentorship, Problem
Solving

Certifications

Crash Course on Python

Coursera / Google

Intro to Software Engineering

Coursera

Cybersecurity Foundations & Mitigation

Coursera

Prompt Engineering for ChatGPT

Coursera

Product Design Certification

UXCEL

Key Projects & Portfolio Work

Zim Gadgets (Django-Python E-Commerce Platform)

Tech Stack: Python, Django, HTML5, CSS3, JavaScript, SQLite/PostgreSQL A full-featured digital storefront designed for tech gadget retail. Built backend REST APIs and secure session management using Django, integrated dynamic product search, filtering, shopping cart functionality, secure checkout flows, and automated inventory management for seamless online operations.

Superfert Fertilizer Commercial Landing Page

Tech Stack: React.js, Tailwind CSS, Responsive UI Design A high-converting, mobile-first web platform crafted for Superfert Fertilizer to showcase agricultural products and drive business inquiries. Features smooth UI transitions, optimized fast page loads, custom product showcases, interactive inquiry forms, and cross-browser accessibility.

DBMS Interactive Learning Platform

Tech Stack: React.js, Node.js, Express.js, SQL, RESTful APIs An interactive web application engineered to simplify relational database concepts for students. Includes live SQL query execution simulations, interactive database schema visualizations, structured database design tutorials, and dynamic progress tracking tools.

Core Competencies

- Full-Stack Web Engineering
- UI/UX & Product Design (UXCEL)
- Prompt Engineering & AI Tools
- RESTful APIs & Backend Architecture
- Cybersecurity & Threat Mitigation
- Technical Support & Troubleshooting
